	Terms & Privacy	
The form should be responsive on mobile device screens	Mobile responsivness	device screens as well

## Notes:

- the Terms & Privacy and Sign-in buttons do nothing consider that this is the expected behavior do not test;
  the Register button takes you to a 404 not found page consider that this is the expected behavior, regardless of the actions taken to get there;
- clicking on the **Register** button will do nothing; no user will be created, no database will be interrogated. Consider this expected behavior.
